

Connect Bluetooth Headphones to Windows 11

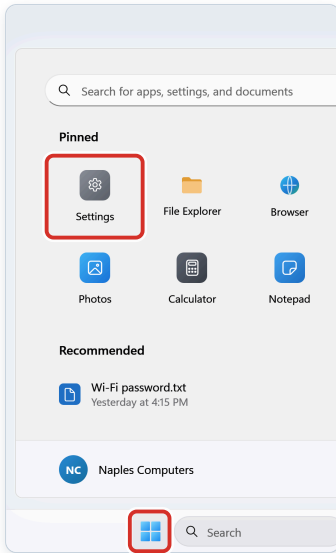

Pair any Bluetooth headphones, earbuds or headset with your Windows 11 PC in a few easy steps.

*We Make
I.T.
Happen!*

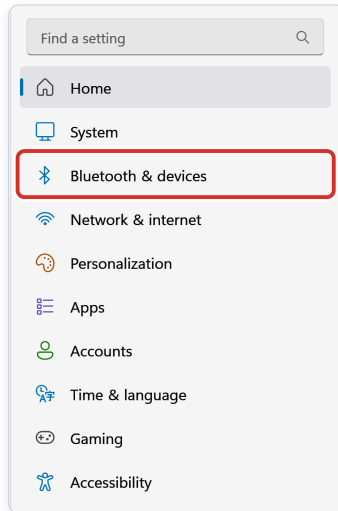

1 Open Settings

Click the **Start** button, then select **Settings**.

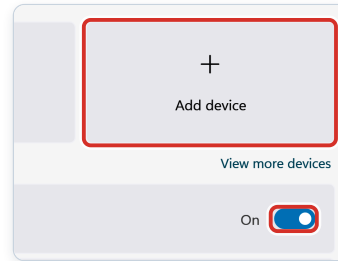

2 Go to Bluetooth & devices

In Settings, click **Bluetooth & devices** on the left.

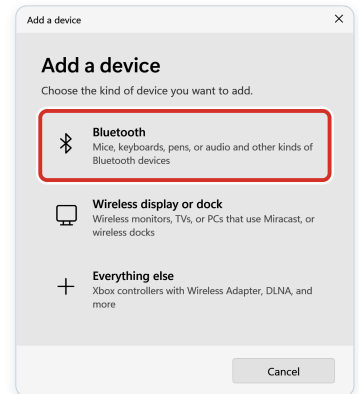

3 Turn on Bluetooth

Make sure **Bluetooth** is **On**, then click **Add device**.

4 Select Bluetooth

In the **Add a device** window, click **Bluetooth**.

5 Put Headphones in Pairing Mode

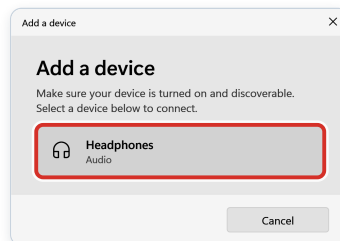

Press & hold the power or Bluetooth button until the light **flashes**.

Every model is a little different. Check the quick start guide if you're not sure.

6 Select Your Headphones

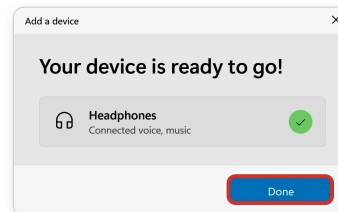

When your headphones appear in the list, **click their name**.

Listed twice? Pick the one with the **headphones icon**, not "LE-".

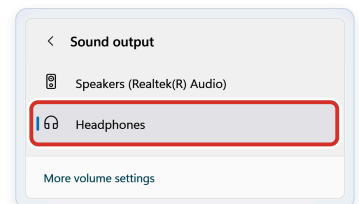

7 Click Done

When Windows says **Your device is ready to go!**, click **Done**.

8 Pick the Sound Output

Sound still on the speakers? In **Quick Settings**, click > next to the volume and choose your headphones.

Good to Know

- **Quick way:** click the network/sound/battery icons on the taskbar, turn on **Bluetooth**, click > and pick your headphones under **New devices**.
- Won't connect? **Remove the device** (Bluetooth & devices → Devices → ... → Remove device), then pair again.
- Keep jumping to your phone? Disconnect them on the phone first. Low battery? Charge them.
