

Find Your Wi-Fi Password Router · Windows 11 · Mac

Forgot it? Check the router, or let a computer that's already connected show you the saved password.

*We Make
I.T.
Happen!*

1 Check Your Router

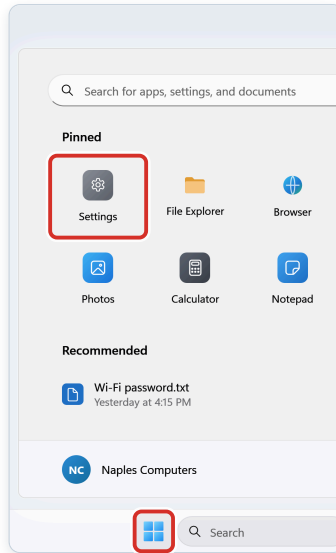

Look for the sticker on the bottom or back: **Wi-Fi Password, WPA Key** or **Network Key**.

Only works if the password was never changed.

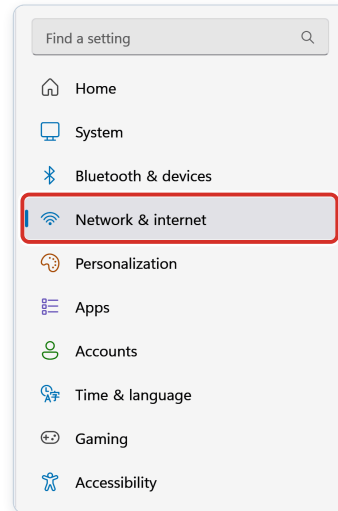

2 Windows: Open Settings

Click the **Start** button, then select **Settings**.

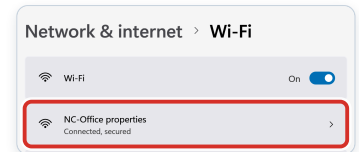

3 Network & internet

In Settings, click **Network & internet**, then **Wi-Fi**.

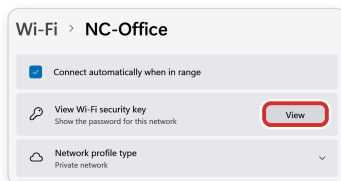

4 Open Wi-Fi Properties

At the top, click your network's **properties**, e.g. **NC-Office properties**.

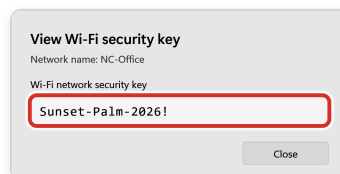

5 View the Security Key

Next to **View Wi-Fi security key**, click **View**.

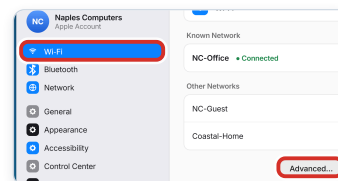

6 There's Your Password

Windows shows the saved **Wi-Fi network security key**. It's case-sensitive.

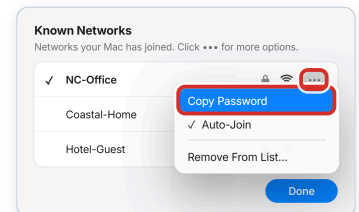

7 Mac: Wi-Fi → Advanced

System Settings → **Wi-Fi**, scroll down and click **Advanced...**

8 Mac: Copy Password

Click ... next to your network, choose **Copy Password**, then paste it into a note.

Good to Know

- **iPhone:** Settings → Wi-Fi → tap ⓘ next to your network → tap **Password**. **Mac:** the Passwords app has a Wi-Fi list too.
- **Never post your Wi-Fi password publicly.** Give visitors a guest network instead.
- Still using the password on the router sticker? **Change it** to a long, unique passphrase. We can help.
