

Hurricane Prep for Your Computers & Tech

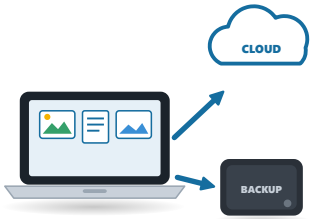

A simple checklist for Southwest Florida homes and small businesses. Do it before every storm.

*We Make
I.T.
Happen!*

1 Back Up Now

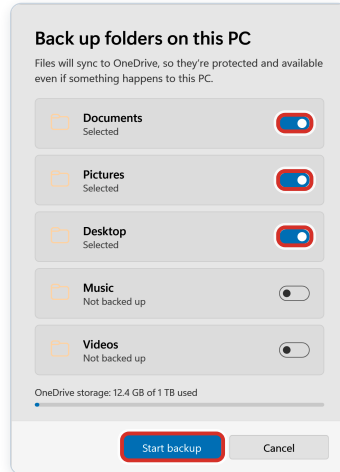

Two copies: an **external drive** and the **cloud** (OneDrive, iCloud or Carbonite).

Keep the drive in a waterproof bag, or take it with you.

2 Windows: OneDrive Backup

Settings → Accounts → Windows backup → Manage sync settings. Turn on folders, then **Start backup.**

3 iPhone: iCloud Backup

Settings → your name → iCloud → iCloud Backup, then tap **Back Up Now.**

4 Photos for Insurance

Photograph each computer, TV and printer, plus the **model & serial number** labels.

Save the photos to the cloud too.

5 Charge Everything

Laptops, phones, tablets and **power banks**, while you still have power.

6 Surge Protector or UPS

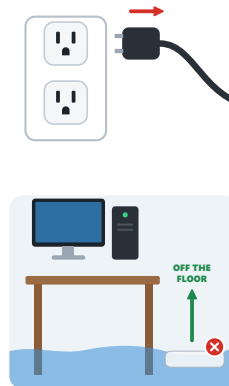

A **surge protector** blocks spikes. A **UPS** adds a battery so you can save and shut down.

We carry APC, Tripp Lite & CyberPower. Replace batteries every 3–5 years.

7 Unplug & Raise It Up

Unplug computers, TVs, modem and router from the wall. Move gear **off the floor.**

8 Keep Numbers Handy

Write down key numbers. Keep ID & policy copies in a **secure cloud** account.

Collier County alerts: alertcollier.com

Good to Know

- Pack a **waterproof bag**: laptop, backup drive, chargers and important papers, ready to grab.
- **Businesses**: write down who shuts down the server and when, and test your offsite/cloud backups.
- Storm damage? **Don't power it on.** Free data recovery assessment: no recovery, no charge.
