

Back for the Season? Snowbird Tech Checklist

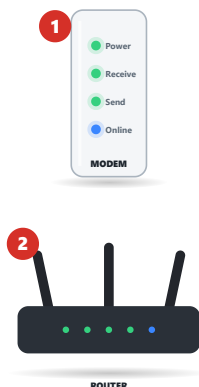

Get your computers, Wi-Fi and smart home running again after months away.

*We Make
I.T.
Happen!*

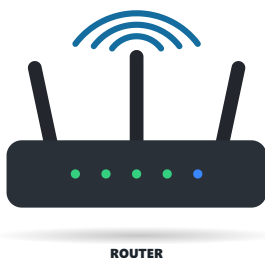

1 Power Up in Order

Modem first (wait for Online), then the **router**, then everything else.

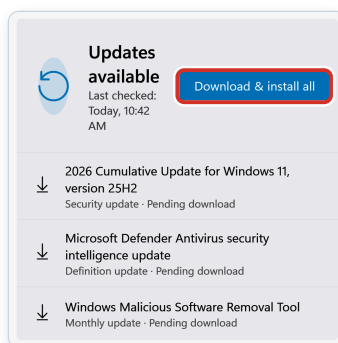

2 Update Your Router

Restart the modem and router, then install **firmware updates** in the router's app.

3 Windows Update

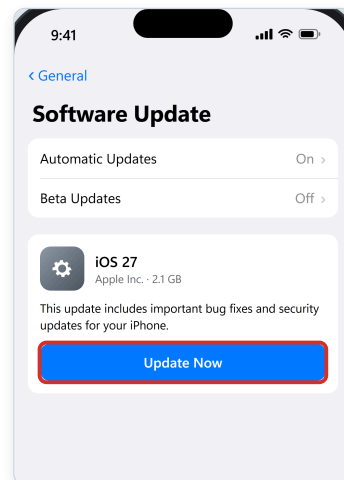

Settings → Windows Update → Check for updates, then **Download & install all**.

Restart, then check again.

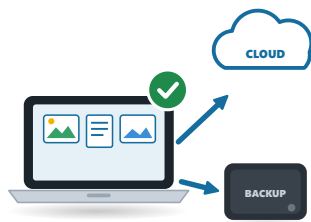

4 iPhone & iPad

Settings → General → Software Update, then **Update Now**.

5 Backups Running?

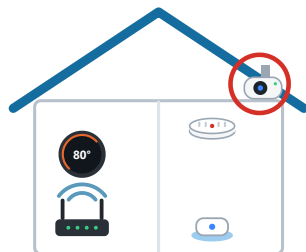

Check for a **recent date**: OneDrive, Time Machine, Carbonite or iCloud Backup.

Plug in your backup drive and run a backup.

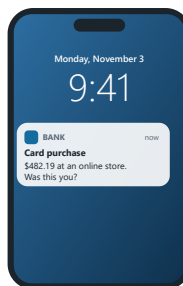

6 Smart Home Online

Cameras, doorbell, thermostat and leak sensors should show **Online**. Install updates.

7 Check Your Accounts

Review statements and sign-in alerts. **Change important passwords** and turn on two-factor.

8 Ink & Batteries

Run the printer's **head cleaning**. Beeping UPS? New battery. Fresh batteries in detectors.

Good to Know

- Check your email for **forwarding rules** you didn't set up. That's a sign of a hacked account.
- Forgot the Wi-Fi password? Check the **router sticker**, or see our video "How to Find Your Wi-Fi Password".
- Rather not do it yourself? Book a **season-opening tune-up**: in our shop, at your home, or remotely.
