How to Make Text Bigger (iPhone, Android, Windows, Mac)

This guide shows how to make text bigger and easier to read on an iPhone, an Android phone, Windows 11, and a Mac.

It's all in **Settings**

- ☐ Every device has a text-size slider
You're not stuck with the size it came with
- ☐ No glasses required
A couple of taps, and everything's easier to read
- ☐ It's not just text
Most of these also offer a bigger-everything display option

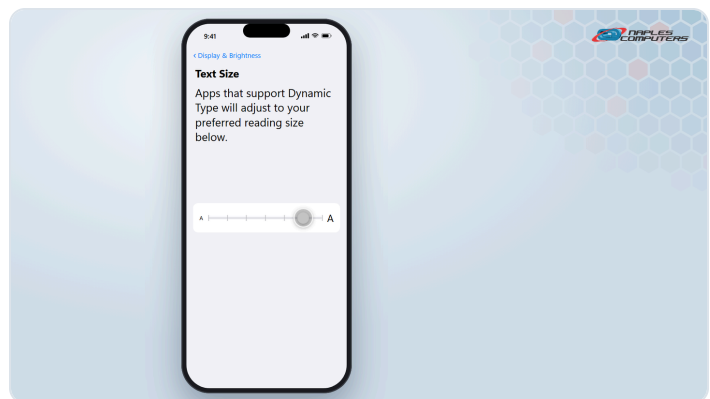

Step by step

IPHONE**1 iPhone: make the text bigger**

Settings → Display & Brightness → Text Size. Drag the slider to the right.

WHAT TO DO

Back on Display & Brightness, turn on Bold Text too.

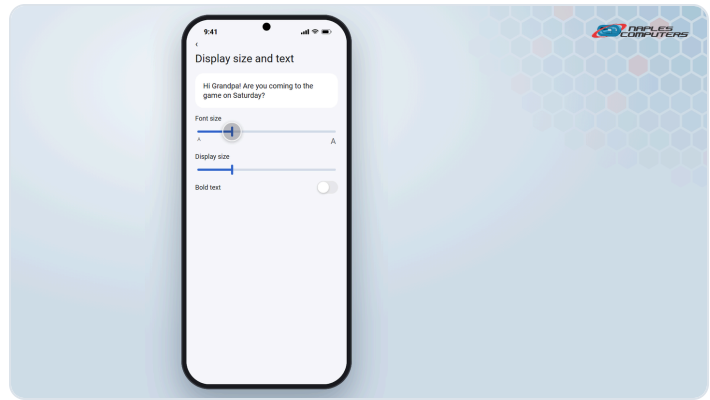

ANDROID

2 Android: make the text bigger

Settings → Display → Display size and text (some phones: Font size and style).

WHAT TO DO

Move the Font size slider to the right, and turn on Bold text too.

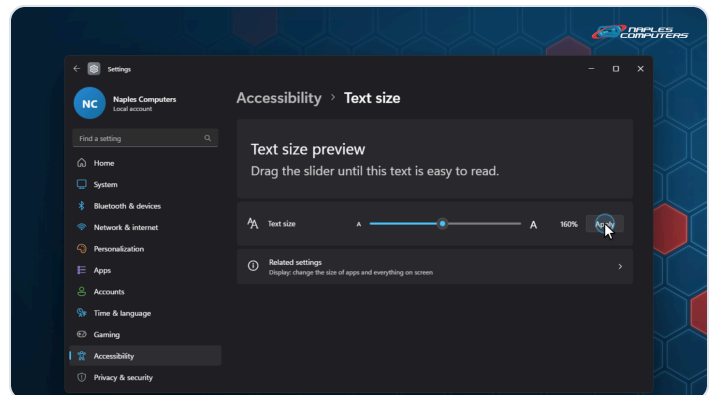

WINDOWS 11

3 Windows 11: make the text bigger

Settings → Accessibility → Text size. Drag the slider, then click Apply.

WHAT TO DO

Only the text gets bigger; everything else stays the same size.

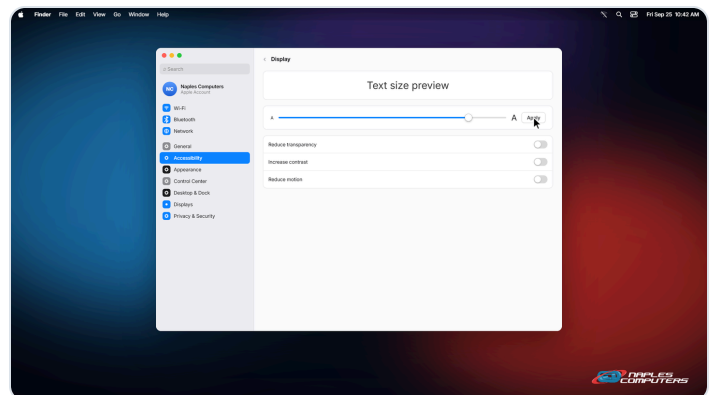

MAC

4 Mac: make the text bigger

System Settings → Accessibility → Display. Drag the Text size slider.

WHAT TO DO

Click Apply. Want everything bigger, not just text? Try Displays → Larger Text instead.

A few tips

- ☐ Zoom just one web page
Hold Control (Command on a Mac) and press plus, no settings needed
- ☐ Bigger isn't always better
Go up one size at a time; too big can cut off text in some apps
- ☐ Not every app follows along
A few older apps keep their own font size, no matter what you set

Recap: make text bigger

☐ iPhone: Settings, Display & Brightness, Text Size

☐ Android: Settings, Display, Display size and text

☐ Windows 11: Settings, Accessibility, Text size

☐ Mac: System Settings, Accessibility, Display

You can also zoom just one web page without changing any settings: hold Control (Command on a Mac) and press plus.
