

Was Your Email in a Data Breach?

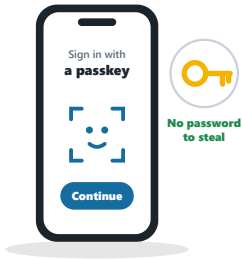

Check for free, and know exactly what to do next.

*We Make
I.T.
Happen!™*

1 Why Check?

Companies get hacked constantly. Your email could be sitting in a **public breach dump** right now.

2 Go to haveibeenpwned.com

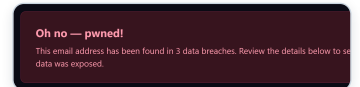

Type your **email address** in the box.

3 Click Check

See the results instantly – **no account, no download.**

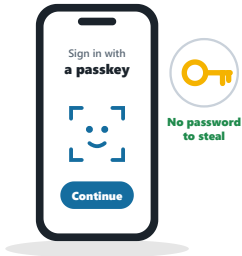

4 Breached? See the Details

A timeline shows **which breaches**, and what data was exposed in each.

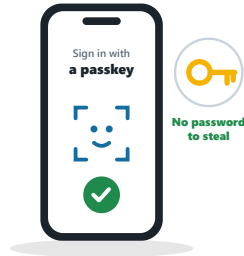

5 Change That Password

Everywhere you **reused it** — start with email, banking, and saved payment info.

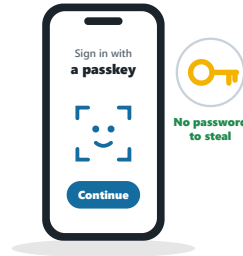

6 Turn On Two-Factor or a Passkey

So a leaked password **alone isn't enough** to get in.

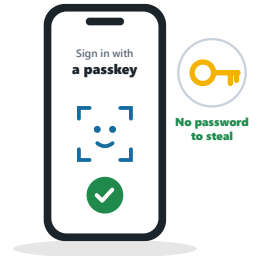

7 Watch for Follow-Up Phishing

Breached data gets used to write **convincing scam** emails and texts.

8 It's Free

Have I Been Pwned never charges. Anyone asking for payment to **"fix"** it is a scam.

Good to Know

- Use a **password manager** so every site gets a different password.
- **Bookmark the real site** — haveibeenpwned.com — instead of trusting a search ad.
- Found a breach and not sure what to do? Call **239-513-1960**.
