Find a Lost Laptop or Phone

Windows, Mac, iPhone, and Android, step by step.

We Make I.T. Happen!™

1 Windows 11: Open Privacy & Security

Settings → **Privacy & security**.

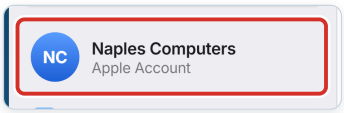

2 Windows 11: Turn On Find My Device

Switch on **Find my device**.

3 Mac: Click Your Name

At the top of the System Settings sidebar.

4 Mac: Choose iCloud

Then select **iCloud** from the list.

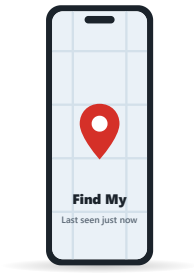

5 Mac: Turn On Find My Mac

This also lets you lock or erase the Mac remotely.

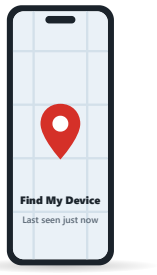

6 iPhone: Settings, Your Name, Find My

Turn on **Find My iPhone** and the Find My network.

7 Android: Settings, Security, Find My Device

Some phones list it under **Security & location** instead.

8 Already Lost One? Locate First

Try to **locate** or **lock** it before you erase it.

Good to Know

- These only work if they're already turned on before a device goes missing — set them up today.
- Once a device is erased remotely, it can no longer be located.
- Still can't find it? Call **239-513-1960** and we'll help.
