

Scam Call or Text?

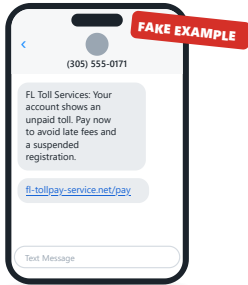

Real examples of toll, bank and robocall scams, and what to do instead.

*We Make
I.T.
Happen!™*

1 Unpaid-Toll Text

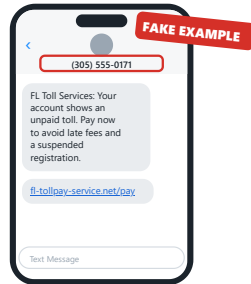

Claims an **unpaid toll** and threatens fees or a suspended registration.

Example only. Number and web address are made up.

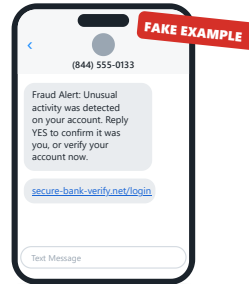

2 Not Your Tollway

The sender is a **random number**, and the link is a copycat web address.

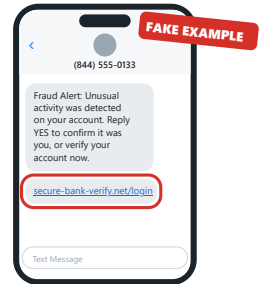

3 Fake Fraud Alert

Asks you to **reply or tap a link** to "verify" your bank account.

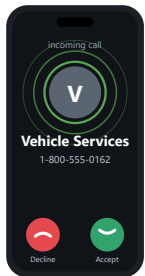

4 Fake Sign-In Page

The link leads to a page built to **steal your username and password**.

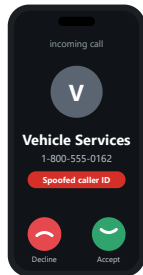

5 The Robocall

A **recorded voice**, not a live person, with a "final notice."

6 Caller ID Lies

Any name or number can show up, even one made to look **local to you**.

7 Go To The Real Thing

Type the **real address** yourself, use the official app, or call a number you already have.

8 Report It

Forward spam texts to **7726 (SPAM)**, and report scams at ReportFraud.ftc.gov.

Good to Know

- Don't press a number to "speak to a representative" or get "removed" — it often just confirms your number is active.
- Real companies don't ask you to "verify" an account, or pay a toll, by tapping a link in a text.
- Not sure if a call, text or link is real? Call **239-513-1960** and we'll check it before you tap or pay.
