Move to a New Phone

iPhone and Android, step by step.

We Make I.T. Happen!™

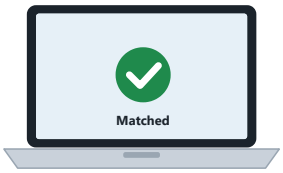

1 iPhone: Place It Near the Old One

Quick Start starts automatically on both screens.

2 iPhone: Follow the Prompts

Matching the animation confirms it's really your device.

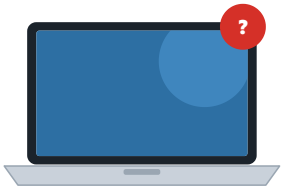

3 iPhone: Keep Both Phones Nearby

Charging, until the transfer finishes completely.

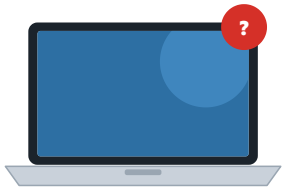

4 Android: Choose Copy Apps & Data

When prompted during setup on the new phone.

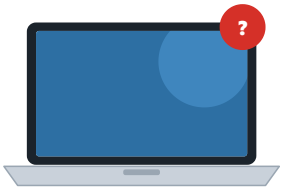

5 Android: Connect With a Cable

Gives the most complete transfer of apps, photos, and settings.

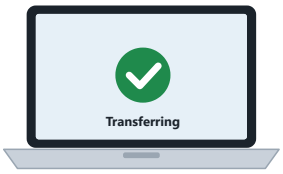

6 Android: No Cable? Use Wi-Fi

Just confirm the matching code on both screens.

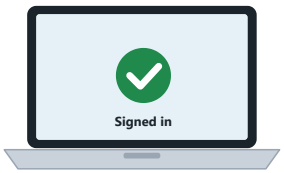

7 Let It Finish

Don't close the setup screen or put either phone to sleep.

8 Check Your Apps

Some may ask you to sign in again; that's normal for banking and authenticator apps.

Good to Know

- No old phone? Restore from an iCloud or Google Account backup instead.
- Keep the old phone for a few days, until everything's confirmed on the new one.
- Transfer giving you trouble? Call **239-513-1960** and we'll walk you through it.
