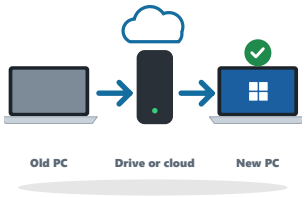
New Computer? Transfer Your Files

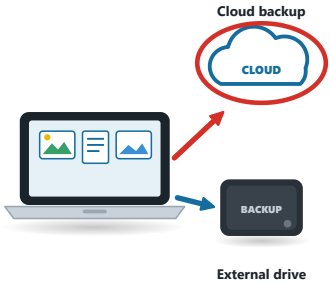
Three ways to bring your files, and what to know first.



We Make I.T. Happen!™

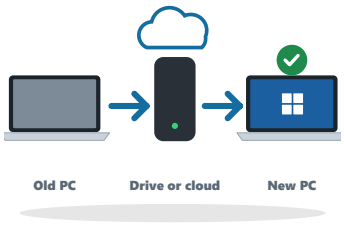
1 Cloud Sync: OneDrive or iCloud

Sign in on the new computer, and your files **reappear automatically**.



2 The Built-In Transfer Tool

Windows Backup, or Migration Assistant on a Mac, **moves most things for you**.

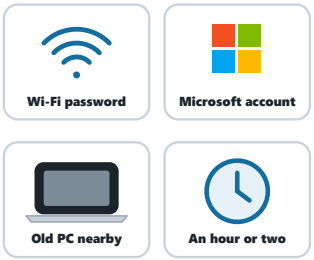


3 Or Copy Everything to a Drive

Works without the internet; best for a **huge photo library**.

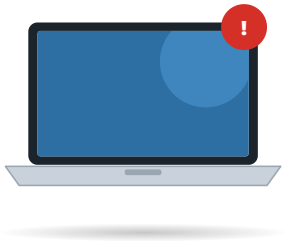
4 Before You Start, Have These Ready

Wi-Fi password, your account, the old computer, and **an hour or two**.



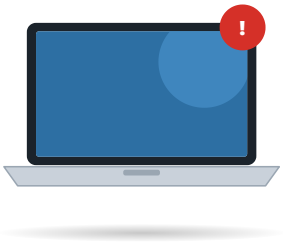
5 Installed Programs Don't Transfer

Most need to be **reinstalled**, or reinstall themselves when opened.



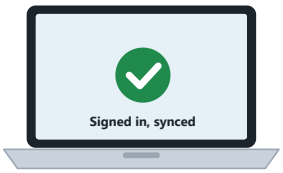
6 Note Your License Keys

Keep them, or the account you bought them under, **before you start**.



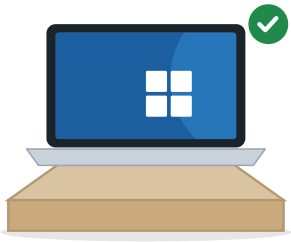
7 Saved Passwords Usually Sync

If you're **signed in** to the same browser account on both.



8 Would Rather We Just Do It?

We transfer your files and **set up the new computer** for you.



Good to Know

- Both computers should be plugged in, and on the same Wi-Fi network.
- Let a cloud upload finish on the old computer before you start the move.
- Want it done for you? Call **239-513-1960** to schedule a transfer.
