

New Year Digital Cleanup

Password checkup, old accounts, and a backup check.

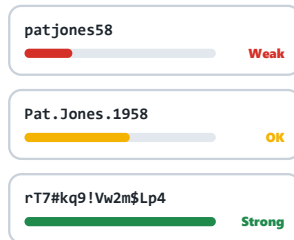

1 Find Reused Passwords

One breached site can unlock **every account** using it.

2 Fix the Weak Ones First

A password manager points out **exactly which ones**.

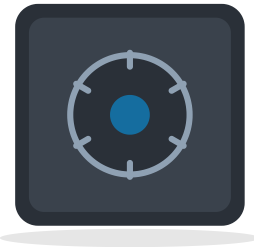

3 List Old Accounts

Old shops, old email addresses, **apps you tried once**.

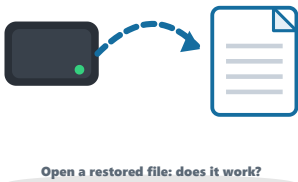

4 Close What You Don't Use

Fewer accounts means **less to ever get breached**.

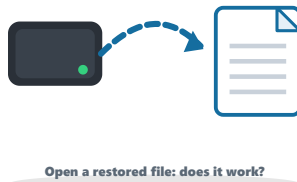

5 Open Your Backup

Check that **recent files** are really there.

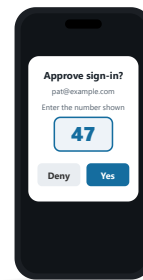

6 Try Restoring One File

It's the only way to know a backup **truly works**.

7 Turn On MFA Everywhere

Start with **email, banking, and social media**.

8 Use a Password Manager

It remembers **strong, unique passwords** for you.

Good to Know

- Do this once a year, it only takes a few minutes if you keep up with it.
- Found something you can't untangle on your own? We can help.
- Want help running the full cleanup? Call **239-513-1960**.
