QR Code Scams:
Look Before You Scan

A sticker, slapped right over the real one.

We Make I.T. Happen!™

1 A Sticker Over the Real Code

Placed right on top, at **parking meters** or restaurant tables.

Example only. Sticker shown is made up.

2 A Fake Payment or Login Page

Looks real, but it's built to **collect your card** or password.

3 Sometimes, Malware

A bad QR code can try to **install something harmful** on your phone.

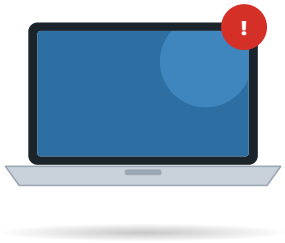

4 Look for a Sticker Stuck On Top

Crooked, peeling, or a **different finish** than the sign around it.

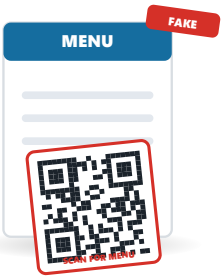

5 Check the Web Address First

Your phone shows a preview — **read it carefully** before opening.

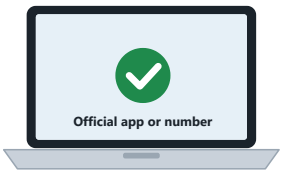

6 Not Just Parking

A fake "scan for menu" sticker works the **same way** at a restaurant.

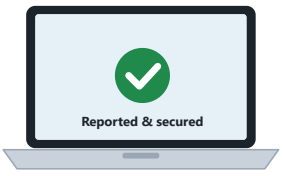

7 Use the Official App Instead

Most parking apps and garages list a **pay-by-phone number** right on the sign.

8 Scanned a Bad One? Act Fast

Entered a password or card? **Change it, and call your card company.**

Good to Know

- Never scan a code from an **unexpected text or email**.
- If in doubt, just **ask your server** for a paper menu.
- Found a suspicious QR code? Call **239-513-1960** and we'll check it.
