Set Up a Guest Wi-Fi Network

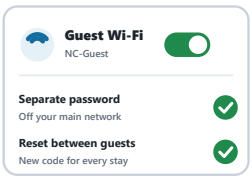

For houseguests, tenants, and vacation-rental guests.

We Make I.T. Happen!™

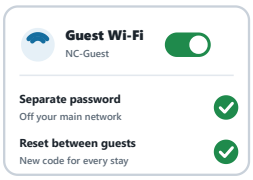

1 Keeps Guests Off Your Network

Your files, cameras, and devices stay **out of reach**.

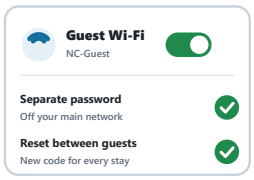

2 Protects You, Too

A guest's activity isn't tied to **your main network**.

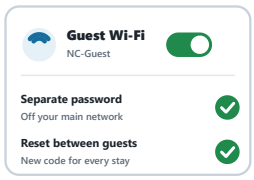

3 Most Routers Already Have This

TP-Link Deco, EnGenius, Ubiquiti: **a simple toggle**.

4 Use WPA2 or Better Encryption

Never leave the guest network **open**.

5 Share the Password When It's Time

For a rental, **after the booking is confirmed**.

6 A QR Code Makes It Effortless

No typing a password; **scan and join**.

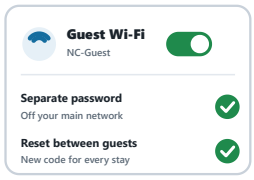

7 Reset It Between Guests

A new guest, **a new code**.

8 Keep the Router Out of Reach

A locked closet, not sitting out where a **guest can reset it**.

Good to Know

- Smart devices like cameras and locks can go on the guest side too, if they only need internet.
- Keep the firmware updated, same router, same rule, for you or for guests.
- Setting up a rental? Call **239-513-1960**, we work with TP-Link Deco, EnGenius, and Ubiquiti.
