

Set Up Two Monitors

Connect it, arrange it, and choose Extend or Duplicate.

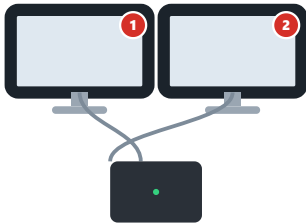

One continuous desktop

*We Make
I.T.
Happen!™*

1 Connect the Cable

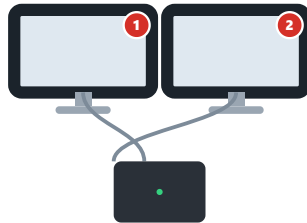

One cable to each monitor: **HDMI, DisplayPort, or USB-C.**

One cable to each monitor

2 Not Detected? Check Updates

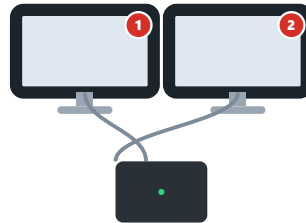

Settings, Windows Update first, then **try a different cable or port.**

One cable to each monitor

3 Not Sure Which Is Which?

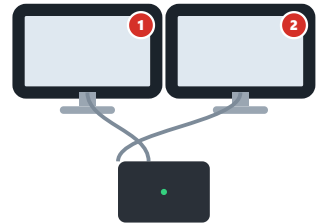

Settings, System, Display, Identify shows **a number on each screen.**

One cable to each monitor

4 Drag to Match Your Desk

In Display settings, drag each screen to **where it actually sits.**

One cable to each monitor

5 Extend: One Bigger Desktop

Drag a window from one screen to the other, it **just keeps going.**

One continuous desktop

6 Duplicate: the Same Screen, Twice

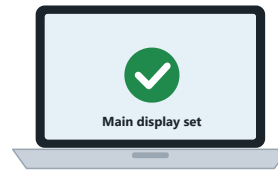

Handy for **presenting**, or showing someone your screen.

The exact same screen, twice

7 Set Your Main Display

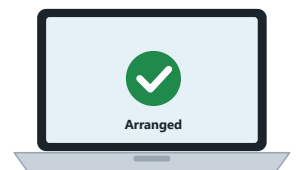

In Display settings, pick which one has the **taskbar and Start menu.**

Main display set

8 On a Mac?

System Settings, Displays, Arrange, works **almost exactly the same way.**

Arranged

Good to Know

- Fuzzy text on one screen? Resolution usually needs to match that monitor's native size.
- Windows key and P switches quickly between PC screen only, Duplicate, Extend, and Second screen only.
- Want it set up for you? Call **239-513-1960** to schedule it.
