Silence Spam Calls

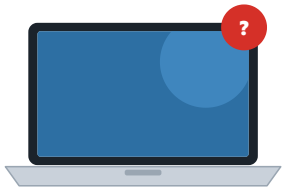

iPhone and Android, step by step.

We Make I.T. Happen!™

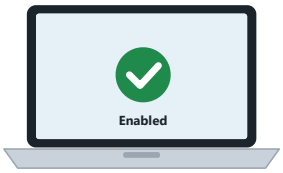

1 iPhone: Open Settings, Then Phone

Where the call options live.

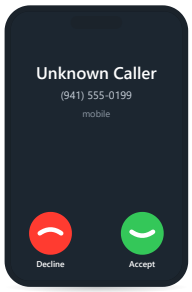

2 iPhone: Turn On Silence Unknown Callers

Numbers not in your contacts stop ringing.

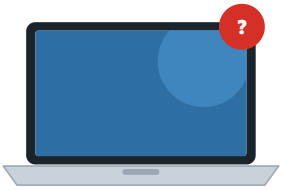

3 iPhone: Check Voicemail and Recents

Silenced calls still show up there, they just don't ring.

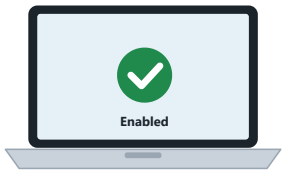

4 Android: Open the Phone App, Then Settings

Look for the spam and caller ID options.

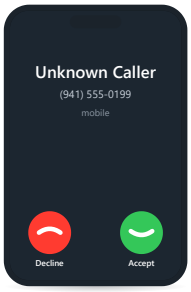

5 Android: Turn On Caller ID & Spam

Suspected spam numbers get flagged before you answer.

6 Android: Try Call Screen Too

On supported phones, an assistant can ask who's calling first.

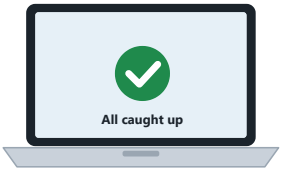

7 Know the Tradeoff

Legitimate unknown numbers get silenced too, like a pharmacy or delivery driver.

8 Check In Now and Then

A quick look at voicemail keeps nothing important from slipping past.

Good to Know

- This silences and flags numbers; it doesn't report or block them.
- For a scam call that gets through anyway, still hang up and don't call back.
- Not sure a setting's doing what it should? Call **239-513-1960** and we'll check.
