Turn On Company-Wide MFA Today

One setting, for every account in your organization.

We Make I.T. Happen!™

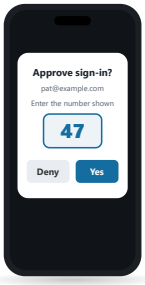

1 Passwords Get Stolen

Through phishing, reuse, or a **breach you never hear about**.

2 MFA Stops It Anyway

A stranger still can't get past the **second step**.

3 Security Defaults: Start Here

Free, in **every Microsoft 365 organization**.

4 Check the Entra Admin Center

Identity, Overview, Properties, **Security defaults**.

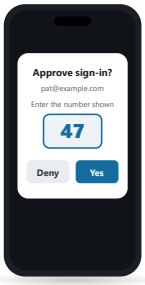

5 Conditional Access: More Control

Needs a Microsoft Entra ID **P1 or P2 license**.

6 What Your Team Will See

Approve the sign-in from the **Authenticator app**.

7 Give a Heads-Up First

A surprise change means **a lot of confused calls**.

8 Revoke Existing Sessions

So everyone **registers for MFA** next sign-in.

Good to Know

- Tenants created after October 2019 often already have Security defaults on.
- Have everyone install the Authenticator app before you flip the switch, not after.
- Want it rolled out for you? Call **239-513-1960**.
