

A Migration With Zero Downtime

Our seven-step process for moving your business to Microsoft 365.

*We Make
I.T.
Happen!™*

1. Assessment

Mailboxes, users, domains and devices, so **nothing gets missed**.

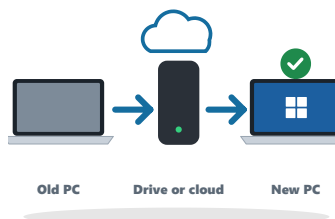

2. New Tenant Built

A new Microsoft 365 tenant, **built and licensed**, before anything changes.

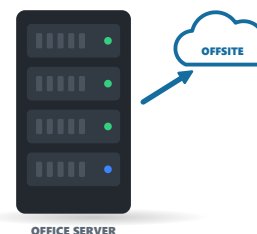

3. Mail Copied Over

While your office **keeps working** on the old system, the whole time.

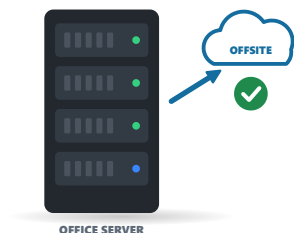

4. MX Record Held

The record that tells the internet where your mail goes is **left exactly where it is**.

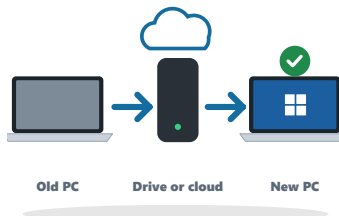

5. The Cutover

Once everything's ready, we switch the MX record, **on a schedule you choose**.

6. Final Sync

Catches any mail sent **during the switch**, so nothing gets lost.

7. Outlook & Phones

A short, guided step for **everyone on the team**.

8. Hundreds of Migrations

This exact same way, for Exchange, GoDaddy, Google Workspace and more.

Good to Know

- The key to zero downtime: the **MX record** stays put until everything is built, synced and double-checked.
- Your office keeps working on the **old system** the entire time mail is being copied over.
- Ready to see what moving would involve? Call **239-513-1960** for a migration assessment.
