Windows Hello & Touch ID

Sign in without a password, on Windows 11 and Mac.

We Make I.T. Happen!™

1 Windows 11: Open Sign-in Options

Settings → Accounts → **Sign-in options**.

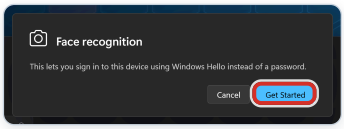

2 Windows 11: Choose Face or Fingerprint

Pick **Facial recognition** or **Fingerprint recognition**.

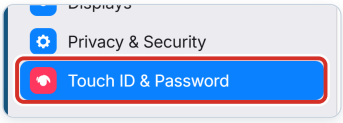

3 Windows 11: Set Up, Then Get Started

Click **Set up**, then **Get Started** in the dialog.

4 Mac: Open Touch ID & Password

Apple menu → System Settings → **Touch ID & Password** in the sidebar.

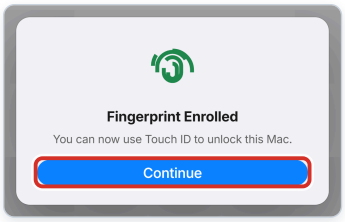

5 Mac: Click Add Fingerprint

Select **Add Fingerprint…** and enter your password.

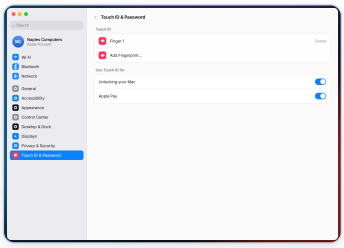

6 Mac: Follow the On-Screen Steps

Lift and rest your finger on the sensor until it's enrolled.

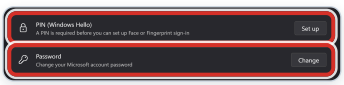

7 Mac: Turn On What You Want

Use Touch ID for **unlocking your Mac** and **Apple Pay**.

8 No Camera or Reader?

A **PIN** or **password** always still works, on either device.

Good to Know

- Windows Hello needs a PIN set up first, before Face or Fingerprint sign-in will work.
- Not every PC or Mac has the camera, reader, or Touch ID keyboard required.
- Lost the match? Your PIN or password always gets you back in, no biometrics needed.
