AI for Small Business

Practical, safe ways to start, and what to avoid.

We Make I.T. Happen!™

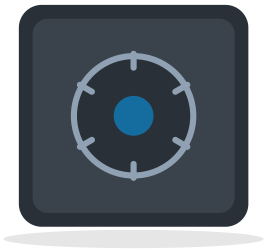

1 Start With One Small Task

Not a **full rollout on day one**.

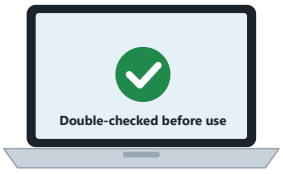

2 Keep Sensitive Data Private

Client details stay **out of public tools**.

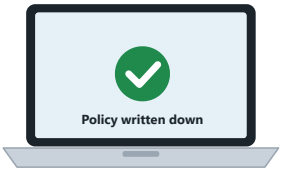

3 Verify AI Output

A person checks it, **every time**.

4 Write a Staff Policy

So everyone follows **the same rules**.

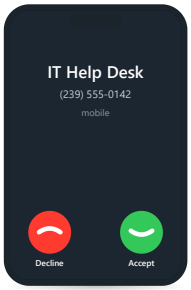

5 Choose Protected Tools

Not just whatever's **free and convenient**.

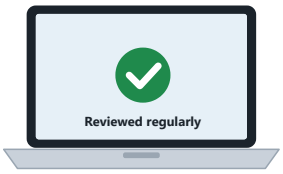

6 Call for a Plan That Fits

Not a **generic one**.

7 Review Results Regularly

Confirm it's still **working as intended**.

8 Know What to Avoid

No sensitive data, **no blind trust**.

Good to Know

- This is general guidance, not legal or compliance advice for your specific industry.
- No specific AI product or vendor is recommended here; the right tool depends on your needs.
- Ready to start AI safely? Call **239-513-1960**.
