Hurricane Plan for Your Office Tech

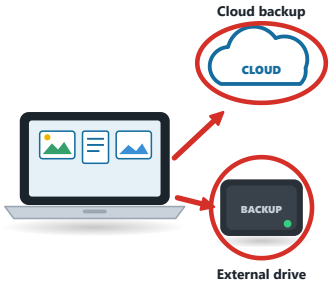

6 things worth doing before, during, and after the storm.

We Make I.T. Happen!™

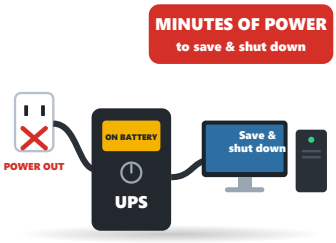

1 Test Your Backups

Off-site or cloud, **not just a local copy**.

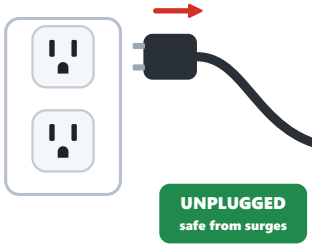

2 Set Up a UPS

A few minutes to save and shut down, **not an abrupt loss**.

3 Unplug Before You Evacuate

Safe from power surges **when it comes back on**.

4 Photograph Your Equipment

Model and serial numbers, **for insurance**.

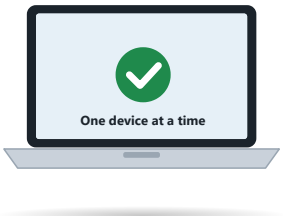

5 Wait for Steady Power

Flickering power can do **more damage than the storm**.

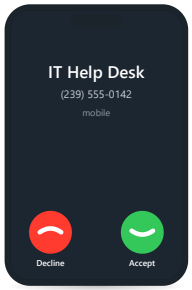

6 Power Up One Device at a Time

Not everything **all at once**.

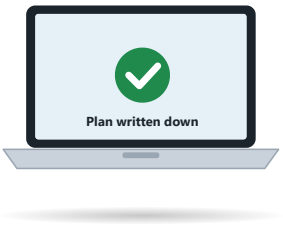

7 Call If Something's Wrong

A real diagnosis, **not a guess**.

8 Put the Plan in Writing

So everyone knows what to do, **not just one person**.

Good to Know

- This is a starting checklist; every building and setup is different.
- No storm predictions or dates are promised here; always follow official evacuation guidance.
- Is your office ready for the next storm? Call **239-513-1960**.
