Office Move Tech Checklist

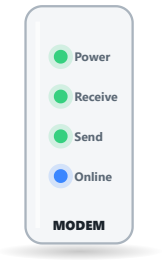

6 things worth planning before moving day.

We Make I.T. Happen!™

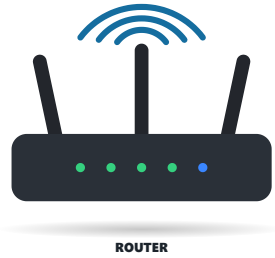

1 Order Internet Early

A new business line can take **weeks to install**.

2 Plan the Network Closet

Decide where equipment and cabling go, **before walls close up**.

3 Design Wi-Fi Coverage

Plan for the whole space, **not just one router**.

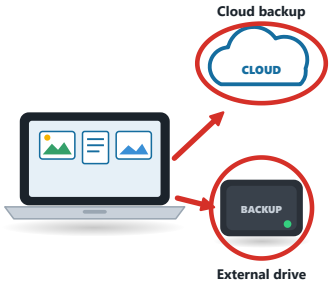

4 Test Printers Before Day One

Set up and tested, **not unboxed on move-in day**.

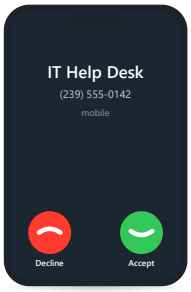

5 Back Up the Server or NAS

Before anything gets **unplugged or moved**.

6 Have One Partner for the Move

Not a different vendor for **every piece**.

7 Keep the Old Office Running

Don't cut over until **the new setup is tested**.

8 Test Everything First

Confirm it all works **before you rely on it**.

Good to Know

- This is a starting checklist; every move has its own timeline and building requirements.
- No prices or lead times are promised here; ask your internet provider for its current timeline.
- Planning a move? Call **239-513-1960**.
