After You Drop Off Your Computer

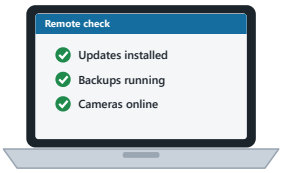

What actually happens, step by step.

We Make I.T. Happen!™

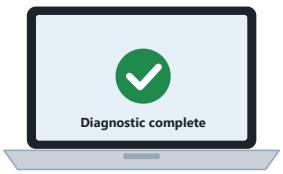

1 Check-In

We note what you told us about the problem.

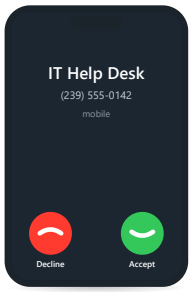

2 Free Diagnostic

A diagnostic confirms what's actually going on, before any work starts.

3 You Hear Back

We explain what we found and what it would take to fix.

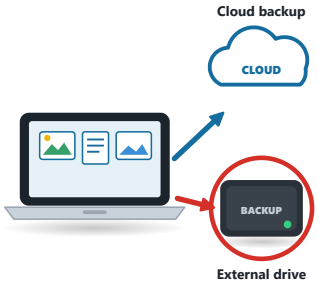

4 You Approve First

Nothing happens to your computer until you say go.

5 Data Backed Up First

When the repair could affect your data, it's backed up before work begins.

6 The Repair

The actual work happens, based on what you approved.

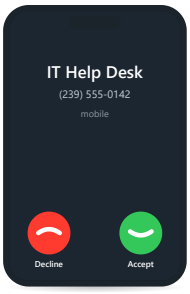

7 A Final Check

Everything is checked to make sure it actually works before pickup.

8 Pickup, With an Explanation

You get a plain explanation of what was done, not just the computer back.

Good to Know

- A free diagnostic always comes first, so you know what's wrong before deciding anything.
- Remote or on-site help are options too; not every fix needs an in-person drop-off.
- Ready to find out what's wrong? Call **239-513-1960** for a free diagnostic.
